He did, but I'm not sure if I can extract a table of all testing data from it. probably not, because they want pre 2008 data too.

We need him to repeat the analysis that he did for EOPS (attached), but by specimens tested, not by specimens assigned.

The earlier the better for his arrival, I suppose, maybe 8 ish?

What time do you need him to come in? I thought he put the database and application on your desktop. Did he finish?

Need kip tomorrow am first thing to run test volume by technician by month for the 8 yrs.

The original data was by date submitted, and i believe it includes specimens with a final disposition of NOT TESTED. ugh. i should just get the dataset dumped to me once and for all. they wanted him to come in tonight but then decided it could wait for first thing in am.
